# Enterprise IT Transformation

## MODERNIZING THROUGH THE LENS OF AGENCY STRATEGY

### End-To-End IT Modernization Transforming Aging Legacy Applications.
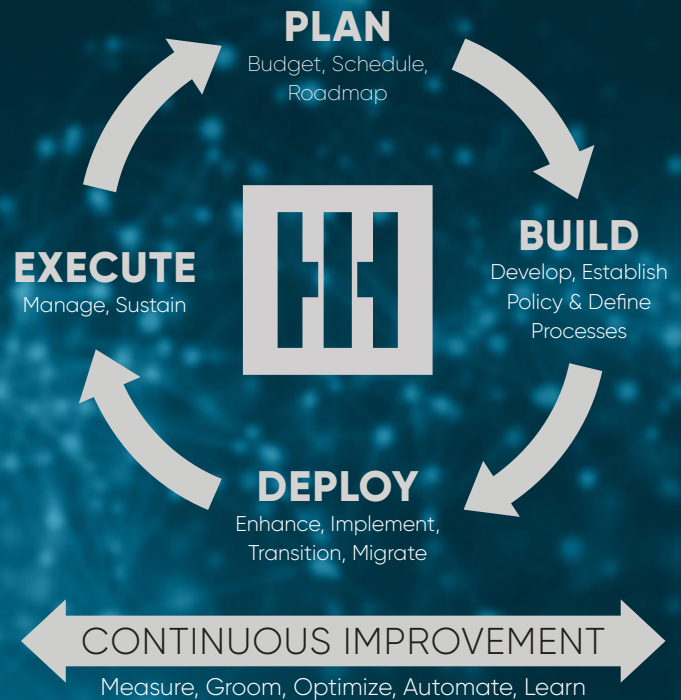

If you are ready to move your IT systems to the cloud, need help architecting your IT enterprise and managing data, or require a process to make informed capital and resource investment decisions with limited funding, HII's team can make that happen.

We work with our federal agency partners to define a strategy to implement flexible, cloud-based platform solutions that enable efficient software delivery, strengthened IT security posture, and cost-effective delivery of national defense services. HII's agile and human-centered design approach keeps pace with evolving technology and modern development practices to achieve measurable impact on IT productivity and enterprise risk management.

With the addition of policy advisory services and knowledge management, HII's enterprise management services provide customers with sustainable change and organizational learning. HII is ready to help your organization modernize and accelerate your IT strategy to advance mission readiness.
