Andy Green

Executive Vice President, HII &
President, HII Mission Technologies

Andy Green is executive vice president of HII and president of HII's Mission Technologies division. Named to this position in 2016, he is responsible for HII's national security solutions in the areas of C5ISR, big data, unmanned systems, electronic warfare, space, advanced modeling and simulation, fleet sustainment, and nuclear services.

Green previously served as corporate vice president of strategy and corporate development and as vice president, component manufacturing with HII's Newport News Shipbuilding division, where he directed the manufacture of major components used in the construction of nuclear-powered aircraft carriers and submarines. He joined HII in 2011 as corporate vice president of investor relations, where he was responsible for the company's relationships with Wall Street analysts and shareholders.

Before joining HII, Green served as vice president of investor relations at Celanese Corp. and was a managing director of high-yield capital markets at Wells Fargo, where he covered the defense and aerospace industry.

Prior to attending graduate school, Green was a manufacturing plant engineer at Eaton Corp. He also qualified as a nuclear engineer and strategic weapons system officer in the U.S. Navy, having served aboard the ballistic missile submarine USS *Tecumseh* (SSBN 628) and as an instructor for junior officers.

He holds a bachelor's degree in systems engineering from the United States Naval Academy and an MBA from Duke University.

Green serves on the board of directors of The Entwistle Co. and the Professional Services Council—where he also serves on the Executive Committee—and on Ford's Theatre Board of Trustees. He is an eight-time recipient of the Washington 100 Award and was named as one of WashingtonExec's Top Executives to Watch in 2024.
